Professional Experience

Dec 2019-Till Date
Software Developer

Winexviv International Ltd, Lagos

At Winexviv, I am responsible for developing Mobile and web Applications such as StartevApp, implementing new features on existing applications and collaborating in an agile environment with scrum ,sprint planning and retrospective sessions.

Worked on Social API integration, Core location APIs, Payment gateway integration, Google Maps, Web Views, Push Notification Service

Jan 2019-Dec 2019
Software Developer

TIZETI Networks Limited

- At TIZETI, we worked on designing a pilot implementation of the procurement and stocking process, to ensure accountability of assets in Php Laravel and mysql

April 2017-Dec 2018
Software Developer

GEI8 Hotels Surulere , Lagos

- At GEI8 , I was responsible for designing and developing websites and applications to boost business growth such as the hotel booking system of the hotel as well as the on Food cart and delivery system GEI8 Kitchen. I managed and created the codebase and ensure prompt response and efficiency of the system.

April 2017-March 2018
Web Developer

Holy Family Secondary School, Takum Taraba State

- *Through understanding teachers' need and pupils challenges* I created an E-facility school management system which managed the academic operations of the school, especially session result calculation.
- I was responsible for training the students on ICT and managed the E-facility online system.

Projects

- Presently working on **Mobiledoc application** for booking   doctors within a specific geographical area at Winexviv international LTD.

- **E-facility school management system for Holy family Schools:**
  https://github.com/leadpresence/E-facility-school-management-system

  I built this school Management system to handle academic results attendance and result checking online

- **TztStock and Inventory Management:** https://github.com/leadpresence/Tzt-STOCK-INVENTORY

  http://testtztproc.topshoplekki.com.ng/

  I built this web application to ease the jobs of the procurement officers and take records of inflow and outflow of assets and stocks.

- **PetiXpense :** https://github.com/leadpresence/PetiXpense
   This mobile application in flutter was designed to help shoppers to manage budget as planned, so as to avoid excessive purchases when going shopping.

- **GEI8 Kitchen** https://github.com/leadpresence/GEI8Kitchen

  I built this web application to allow clients to order meals on the go and get it delivered in the shortest time possible. It also has a paystack API to facilitate payments.

-
  Flutter Text-To-Speech & Speech-To-Text : https://github.com/leadpresence/FlutterTTS-STT
- A mini project to test Text_to_spech and Speech_Recognition in Flutter for the visual impaired on Android and iOS.

- **StartevApp :**Responsible for implementing the store and payment feature, users feeds and profile with angular and ionic with other team of developers
